SOS/I_glob pair C: 1 W/m² planetary boundary (Bjørn & Hauschild 2015)
9.14 (+89%)
Soil carbon: lowest soil order (Raw)
4.48 (-8%)
Soil carbon: highest soil order (Organic)
6.42 (+32%)
AR base window 2021-2025 (5 yr, as Horup)
4.73 (-2%)
AR base window 2006-2025 (20 yr)
5.83 (+20%)
AR base window 1992-2025 (full consistent history)
5.93 (+22%)
Population: Stats NZ 5th percentile (carbon and boundaries)
3.76 (-22%)
Population: Stats NZ 95th percentile (carbon and boundaries)
5.83 (+20%)
Materials: lowest single case study
3.83 (-21%)
Materials: highest single case study
5.81 (+20%)
Frozen technology: 2025 factors held (no decarbonisation)
5.54 (+14%)
Wider scope: base and projection include the maintenance (B2, B4) of every cohort since 1992
5.36 (+11%)
Low replacement: long-run rate
4.56 (-6%)
High replacement: 2018-2023 rate persists
5.25 (+8%)
