a Vacancy: empty homes only
Vacancy rate (% of private dwellings)
b Stock = households / (1 − vacancy) + 2026 overbuild
Dwellings or households (million)
Census 1986–2023 range, one definition (4.0–5.4%)
2013 → 2018 empty / away definition break
Published empty share (model)
One definition: pooled 2018/2023 empty share
Held at its published 2023 census value (5.39%)
Implied: held rate + unabsorbed 2026 overbuild / stock
Census empty (published)
Census empty (2013 split applied)
All unoccupied (rejected)
Dwelling stock
Households: census-benchmarked to 2018
2019–23: Stats NZ estimates scaled to the 2023 census (×0.824)
2024–25: consent-derived estimates, not used
2023 census
Stock, projection (incl. the unabsorbed 2026 overbuild)
Households, projection
c Dwellings per year by component
Dwellings (thousand per year)
unexpl. +2.1k
unexpl. +2.6k
unexpl. -0.3k
unexpl. -5.9k
unexpl. -0.0k
unexpl. +0.8k
unexpl. -0.6k
1986–91 not covered (calibration starts 1991)
New households
Vacancy (allowance and change)
Net replacement, history (census dwelling counts; parts not separable)
Demolition replacement
Recent replacement surge
2026 overbuild
Unexplained building
Unconsented additions
Retirement villages (out of scope)
Overbuild absorbed
Dwellings built, in scope (observed, annual)
Dwellings built, in scope (projection)
Negative part: outline in its colour, hanging from the top of the stack
Net total of a bar with a negative part
