Population: Stats NZ 5th / 95th percentile (low)
Population: Stats NZ 5th / 95th percentile (high)
Household size: Stats NZ High / Low variant (low)
Household size: Stats NZ High / Low variant (high)
Household size after 2043: flat
Household size after 2043: secant-slope taper
Household size after 2043: taper from the PCHIP end slope
Completion rate 0.92 / 0.96 (low)
Completion rate 0.92 / 0.96 (high)
Completion lag on (Little's law)
No census under-construction correction
Dwelling-size window 2016-2025
2026 overbuild absorbed by 2030 / by 2045 (low)
2026 overbuild absorbed by 2030 / by 2045 (high)
2026 overbuild never absorbed (MODEL v2.1 Reference)
Vacancy parameter: 1986-2023 census mean (one definition)
2026 overbuild booked as stock-neutral redevelopment
2026 overbuild gap vs the 2026 requirement
Low / High replacement (low)
Low / High replacement (high)
Very High replacement (trend continues)
Replacement half-life 5 / 15 yr (low)
Replacement half-life 5 / 15 yr (high)
Single case study: lowest / highest (low)
Single case study: lowest / highest (high)
Case studies: jackknife low / high (low)
Case studies: jackknife low / high (high)
Frozen technology (2025 factors held)
Decarbonisation: proxy-mapped items held
Decarbonisation: NZ-made electricity-intensive items held
Soil order: lowest (Raw) / highest (Organic) (low)
Soil order: lowest (Raw) / highest (Organic) (high)
A4-A5 on each item's own path / held at 2025 (low)
A4-A5 on each item's own path / held at 2025 (high)
Soil carbon loss on all floor area, including replacement
Event timing L / n
